

PAT testing from SG World

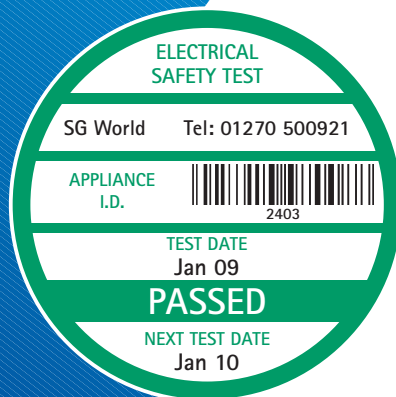

Your assets, our test, your results.

Put us to the test

SG World uses state of the art wireless technology to carry out your PAT testing.

This means lower CO₂ emissions because our engineers don't drive the results to our offices for processing before being delivered to you.

Our system is also paperless - your results are sent in real-time to a secure website - where you can view, print or download them into Excel.

Other solutions	The SG World solution
<ul style="list-style-type: none"> ● Customer places order ● Engineer on-Site ● 400 items per day, per engineer ● A paper/pass fail label ● Paper reporting process ● Back office process of data ● Results print out delivered 4-6 weeks later 	<ul style="list-style-type: none"> ● Customer places order ● Engineer on-Site ● 500 items per day, per engineer ● Tamper-proof Fail labels, bar coded ● Manufacturer's Serial Number collection (if requested) ● Instant test report, uploaded online ● Accurate item location & condition report ● Full asset audit if required at the same time

Our fully qualified and CRB checked engineers will visit your location, even over a weekend, to minimise disruption and complete your PAT testing with speed, efficiency and accuracy. Each engineer can complete over 500 tests per day using our unique technology solution.

These results are uploaded immediately to your own secure website. Our technology also enables us to pass on cost savings to you as well as providing an accurate asset register.

Contact us today and see how SG World can improve your PAT testing process.

PAT testing from SG World gives you.....

- Results available immediately
- Online Asset Register
- Less CO₂ Emissions and no paper
- More tests per day - so less time and disruption on your premises
- Free plug and fuse changes
- Free microwave emission tests
- Collection of manufacturers serial numbers (free of charge)
- Itemised invoicing
