

Visitor pass

Our visitor pass product is a prestigious system which projects a professional image and creates that all important first impression whilst controlling the access of visitors to your site.

Visitor passes can be personalised to your requirements.

Visitors are automatically recorded in the visitor book each time a visitor pass is issued.

The Visitor Pass identifies and validates every visitor to your site and can also be used to control vehicles or identify temporary staff.

Provides an accurate up to date log of all visitors on your premises in case of emergency.

We design your visitor system to fully reflect your brand image and the specific needs of your organisation.
